TITANSTAR PROPERTIES INC.

NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(expressed in Canadian dollars)

1. Organization

TitanStar Properties Inc. (the “Company”) was incorporated under the *Canada Business Corporations Act* on June 3, 2008 and is a real estate holding company trading on the TSX Venture Exchange (common shares “TSXV: TSP”, convertible debentures “TSXV: TSP.DB”). The Company issued share capital and commenced operations on June 30, 2008. The registered office of the Company is 1745 - 1050 West Pender Street, Vancouver, BC, V6E 3S7.

The sole business of the Company is the ownership of real property interests, consistent with a well-established investment policy. The Company seeks to create a portfolio of stabilized income producing real estate assets primarily in the United States southwest area with value to be maximized through the acquisition of well-positioned, quality assets where management believes there will be lease rate increases in the future and decreasing capitalization rates that will each contribute to value creation. The initial focus is on necessity-based, nationally-anchored retail/commercial properties, community centers and industrial properties.

For the three months period ended March 31, 2016, the Company had a comprehensive loss of \$2,271,061 (April 30, 2015 – \$2,139,809) and has a deficit of \$9,704,363 (April 30, 2015 - \$6,443,304). As at March 31, 2016, the Company had working capital deficiency of \$207,016 (April, 2015 – \$12,375,212). In addition to ongoing working capital requirements, the Company may be required to secure sufficient funding for acquisitions, general and administration costs and interest charges. Although management may have been successful in the past in undertaking financings, there can be no assurance that management will be able to do so in the future on terms acceptable to the Company. These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize assets and discharge liabilities in the normal course of operations for the foreseeable future. These condensed consolidated interim financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported revenues and expenses, and consolidated statement of financial position classifications that may be necessary were the going concern assumption inappropriate. These adjustments could be material.

These condensed consolidated interim financial statements have been approved for issue by the Board of Directors on December 13, 2016.

TITANSTAR PROPERTIES INC.**NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**(expressed in Canadian dollars)

2. Basis of presentation

These condensed consolidated interim financial statements are prepared in accordance with International Accounting Standards (“IAS”) 34 Interim Financial Reporting using the same presentation and accounting policies in the December 31, 2015 audited financial statements. They do not include all the information and disclosures normally provided in annual financial statements and should be read in conjunction with the audited annual consolidated financial statements and the notes thereto for the year ended December 31, 2015.

The condensed consolidated interim financial statements are prepared on a going concern basis and have been presented in Canadian dollars. The condensed consolidated interim financial statements have been prepared on a historical basis.

3. Critical accounting judgments, estimates and assumptions

The preparation of the Company’s financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that effect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected. Management bases its judgments, estimates and assumptions on factors it believes to be reasonable in the circumstances, but which may be inherently uncertain and unpredictable. In the process of applying the Company’s policies, management has applied the same methodologies in making significant accounting judgments, estimates and assumptions as disclosed in the Company’s consolidated statements for the year ended December 31, 2015.

4. Short-term investments

Short-term investments consist of term deposits held with a chartered bank bearing interest at 0.05% interest per annum (December 31, 2015 – 0.05% interest per annum) and are due April 30, 2016 (December 31, 2015 – January 31, 2016).

5. Investment properties

On March 30, 2016, the Company announced it had completed purchase of a 100% interest in Metro Gateway Shopping Center (TSP Metro Gateway, LLC) at the contracted price of \$9,100,000 USD. The acquisition was financed with a \$6,080,000 USD mortgage with the remainder financed with the proceeds from the \$4,500,000 issuance of convertible unsecured subordinated debentures. The seller was at arm’s length to the Company.

The Company’s interest is held through the Company’s wholly-owned subsidiary, TitanStar US Inc.

7. Promissory note payable

On December 16, 2013, the Company received promissory note payable proceeds of \$400,000. The promissory note payable is unsecured, accrues interest at a rate of 6% per annum, and is due on demand.

8. Related party transactionsAsset management agreement

On April 16, 2010, the Company entered into an asset management agreement with TitanStar Capital Corp. (“Titanstar Capital”) (the “Asset Manager”), pursuant to which the Asset Manager will provide asset management, administrative and other services to the Company and its subsidiaries. TitanStar Capital is a corporation owned by TitanStar Investment Group Inc., which is owned by T. Richard Turner, Chief Executive Officer of the Company. The Company has the right to terminate the asset management agreement at any time upon 60 days’ notice. The Asset Manager is entitled to a monthly advisory fee.

For the three months period ended March 31, 2016, the Company paid \$3,000 plus GST (April 30, 2015 - \$3,000 plus GST) to the Asset Manager for management fees pursuant to the asset management agreement.

Debt settlement agreement

On May 28, 2014, the Company entered into debt settlement agreements, pursuant to which it would issue an aggregate total of 9,846,152 common shares in lieu of cash for the repayment of a total of \$800,000 amounts due to related parties. The debt settlements were subject to the Company receiving all necessary prior approvals from TSXV. On June 5, 2014, with TSXV approval, the Company issued 9,846,152 common shares for the debt settlement agreements mentioned above, at a price of \$0.08125 per share. The common shares issued were subject to a four month hold resale restriction.

Convertible unsecured subordinate debentures

On September 30, 2014, the Company closed a private placement of an aggregate principal amount of \$2.5 million convertible unsecured subordinated debentures. The debentures are held by a private company of which the President and CEO of the Company is a principal, and by a private company of which a director of the Company is a director. The Debentures bear interest at 7.5% per annum and mature on September 30, 2019. The Company may repay all or a portion of the indebtedness owing under the Debentures at any time without penalty.

8. Related party transactions (continued)

Each Debenture is convertible into units with each comprised of one common share and one share purchase warrant at a conversion price of \$0.09 in the first year, and for each year thereafter at a conversion price equal to the greater of the closing sales price (or the closing bid, if no sales were reported on the date of determination) of the common shares on the TSX Venture Exchange or \$0.10. Each warrant will entitle the holder to acquire an additional share at an exercise price equal to the conversion price of the Debentures in effect at the time such warrants are issued, and will expire on September 30, 2019.

The calculated present value of \$2,219,011 was calculated using a discount rate of 10%, and the residual amount of \$280,989 was allocated to the conversion feature.

The conversion feature is considered an embedded derivative liability as the conversion price varies based on the conversion date and closing sales price of the Company's common shares. The embedded derivative liability is classified as a current liability on the consolidated statement of financial position and is carried at fair value of \$nil (December 31, 2015 - \$nil) as determined by the Black-Scholes option pricing model, with changes in fair value recorded as gains and losses in the net loss.

On October 30, 2015, the Company closed a non-brokered private placement of an aggregate principal amount of \$450,000 convertible unsecured subordinated debentures. The debentures are held by a private company of which a director of the Company is the Chairman and CEO. The Debentures bear interest at 8% per annum, commencing in August 2016, and mature on October 30, 2020. The Company may repay all or a portion of the indebtedness owing under the Debentures at any time without penalty.

Each Debenture is convertible into common shares at a conversion price of \$0.06825 per share in the first year, and for each year thereafter at a conversion price equal to the greater of the market price of the Company's common shares at the time of conversion or \$0.10.

The conversion feature is considered an embedded derivative liability as the conversion price varies based on the conversion date and closing sales price of the Company's common shares. The embedded derivative liability is classified as a current liability on the consolidated statement of financial position and is carried at fair value of \$767 (December 31, 2015 - \$13,849) as determined by the Black-Scholes option pricing model, with changes in fair value recorded as gains and losses in the net loss. The assumptions in valuing the embedded derivative liability as at March 31, 2016 include an expected volatility of 70% (December 31, 2015 - 91%), a risk free interest rate of 0.66% (December 31, 2015 - 0.48%) and an expiry of October 30, 2016 (level 2).

The calculated present value of \$419,544 was calculated using a discount rate of 8.3%, and the residual amount of \$30,456 was allocated to the conversion feature.

8. Related party transactions (continued)

On March 30, 2016, the Company closed an aggregate principal amount of \$4,500,000 of 8.0% convertible unsecured subordinated debentures. The debentures are held by a private company of which a director of the Company is the Chairman and CEO. The Debentures bear interest at 8% per annum and mature on March 30, 2021. The Company may repay all or a portion of the indebtedness owing under the Debentures at any time without penalty.

Each Debenture is convertible into common shares at a conversion price of \$0.05381 per share in the first year, and for each year thereafter at a conversion price equal to the greater of the market price of the Company's common shares at the time of conversion or \$0.10.

The conversion feature is considered an embedded derivative liability as the conversion price varies based on the conversion date and closing sales price of the Company's common shares. The embedded derivative liability is classified as a current liability on the consolidated statement of financial position and is carried at fair value of \$59,367 as determined by the Black-Scholes option pricing model, with changes in fair value recorded as gains and losses in the net loss. The assumptions in valuing the embedded derivative liability as at March 31, 2016 include an expected volatility of 70%, a risk free interest rate of 0.66% and an expiry of March 30, 2017 (level 2).

The calculated present value of \$3,990,632 was calculated using a discount rate of 8.3%, and the residual amount of \$59,368 was allocated to the conversion feature.

Non-binding term sheet

On May 2015, the Company entered into a non-binding term sheet with Titanstar Capital, Inovalis S.A ("Inovalis") and Hoche Partners International ("Hoche"). Inovalis and Hoche exert significant influence over the Company. Under the agreement, Titanstar Capital and Inovalis will each receive various fees in the form of shares of the Company. The dollar amount of fees by Titanstar Capital and Inovalis are calculated as follows:

- a) 0.75% to Titanstar Capital of the net asset value of the Company calculated quarterly in arrears
- b) 0.75% to Inovalis of the equity raised or arranged by Inovalis
- c) 0.375% to Inovalis and 0.375% to Titanstar Capital on the equity raised on the Canadian capital market

The number of shares to be issued in exchange for the dollar amount of fees of the Company will be calculated using the one week average share price prior to payment of the asset management fees, with a minimum price of \$0.06 per share.

8. Related party transactions (continued)Martin Downs Town Center

On September 18, 2015, the Company acquired a 49% interest in Martin Downs Town Center for total consideration, including closing costs, of \$3,146,172 (\$2,369,075 USD). Consideration and closing costs for the acquisition were paid by the issuance of common shares and cash. The Company acquired its interest from a company jointly owned and controlled by Inovalis and Hoche.

Loan facility

On December 15, 2015, the Company announced that it has obtained a loan facility for up to \$750,000. Under the terms of the loan facility, the Company may draw advances in any amount from time to time from January 1, 2016 to December 31, 2016. Interest on any outstanding drawdowns will accrue at a fixed rate of 8% per annum, and is payable monthly. Outstanding indebtedness is payable on demand. The loan facility is provided by a private company of which the President, CEO and director of the Company is a principal.

Metro Gateway Shopping Center

On March 30, 2016 the Company completed the purchase of Metro Gateway with proceeds of the previously described \$4,500,000 debenture offering issued March 30, 2016 and issued to a private company of which a director of the Company is Chairman and CEO.

A small portion of the debenture offering was allocated to working capital.

11. Share options

The Company's share option plan was approved by the shareholders at the annual general meeting on December 2, 2009. The share option plan provides that the aggregate number of common shares reserved for issuance under the share option plan, together with any share options outstanding, will not exceed 10% of the Company's issued and outstanding common shares at any time. The exercise price of an option will be determined by the board of directors but will, in any event, not be less than the discounted market price of the Company's common shares at the time of the grant of the option.

On July 29, 2015, the Company issued share options under its share option plan to directors, officers and employees of the Company. The total number of options granted was 1,245,000 at an exercise price of \$0.06. The options are to be vested over three years with the first vesting representing 1/3 occurring immediately and have a term of 10 years.

The fair value of each share option is estimated on the date of the grant using the Black-Scholes option pricing model. The following assumptions were used for options issued during the year ended December 31, 2015:

Dividend yield	0%
Risk-free interest rate	1.22%
Expected average option term	10 years
Volatility	44.6%

17. Capital management

The Company's objectives when managing capital of \$29,806,217 (December 31, 2015 - \$19,713,901), which is share capital, contributed surplus, equity component of convertible debentures, accumulated other comprehensive income, deficit, promissory note payable, due to related parties, convertible debentures, embedded derivative liability and long-term debt, are to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, and to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new common shares, or sell assets to reduce debt.

The Company monitors capital from time-to-time using a variety of measures. Monitoring procedures are typically performed as a part of the overall management of the Company's operations. The Company's strategy during the period, which was unchanged from the prior period, was to maintain its ability to secure access to financing at a reasonable cost. The requirements and terms of sources of capital cannot be predicted and change in ways the Company cannot predict.

18. Risk management and fair values

The main risks that arise from the Company's financial statements are liquidity risk, interest rate risk, credit risk and foreign exchange risk. The Company's approach to managing these risks is summarized below.

18. Risk management and fair values (continued)

Management's risk management policies are typically performed as a part of the overall management of the Company's operations. Management is aware of risks related to these objectives through direct personal involvement with employees and outside parties. In the normal course of its business, the Company is exposed to a number of risks that can affect its operating performance. Management's close involvement in operations helps identify risks and variations from expectations. The Company has not designated transactions as hedging transactions to manage risk. As a part of the overall operation of the Company, management considers the avoidance of undue concentrations of risk.

These risks and the actions taken to manage them include the following:

Liquidity risk:

Liquidity risk is the risk that the Company cannot meet its financial obligations associated with financial liabilities in full. The Company's source of liquidity is its equity. The risk with issuing new capital is that the capital markets may not be receptive to an equity issue with financial terms favorable to the Company. The funds are primarily used to finance working capital and are adequate to meet the Company's financial obligations associated with financial liabilities.

The Company's financial liabilities include accounts payable, due to related parties, and promissory note payable which are all currently due. Convertible debentures at face value are due in 2018 and the related party convertible unsecured subordinated debentures are due in 2019 and 2020.

Interest rate risk:

Interest rate risk is the risk that changes in market interest rates may have an effect on the cash flows associated with some financial instruments, known as interest rate cash flow risk, or on the fair value of other financial instruments, known as interest rate price risk. The Company invests in short-term investments that may be cashed prior to maturity.

There is interest rate risk associated with the loan payable in the joint ventures and associates as the interest is impacted by changes in the prime rate. If interest rates would have been 1% higher (or lower) for the period ended March 31, 2016, the Company would have higher (or lower) share of income of joint ventures and associates included in net loss of approximately \$87,197 (December 31, 2015 - \$153,400).

The sensitivity analysis does not take into consideration that the Company's assets and liabilities are actively managed. Additionally, the financial position of the Company may vary at the time that any actual market movement occurs or be mitigated by management actions to reduce exposure to risks.

Other limitations in the sensitivity analysis include the use of hypothetical market movements to demonstrate potential risk that only represent the Company's view of possible near-term market changes that cannot be predicted with any certainty; and the assumption that all interest rates move in an identical fashion.

Credit risk:

Credit risk arises from the possibility that debtors or tenants may be unable to fulfill their commitments. For a financial asset, this is typically the gross carrying amount, net of any amounts offset and any impairment losses. The Company has credit policies to address credit risk on accounts receivable (tenants), which may include the analysis of the financial position of the debtor or tenant and review of credit limits. The Company also may review credit history before establishing credit and review credit performance. In the case of a tenant, management carefully watches and monitors rent payments which are due each month. An allowance for doubtful accounts or other impairment provisions are established based upon factors surrounding credit risk, historical trends and other information.

A financial asset is past due when a debtor has failed to make a payment when contractually due. The Company has no financial assets that are past due and does not have an allowance for doubtful amounts receivable.

Foreign exchange risk:

Foreign exchange risk is the risk that changes in foreign exchange rates may have an effect on future cash flows associated with financial instruments. The Company is exposed to foreign exchange risk as its joint ventures and associates investments undertake their economic activities in U.S. currency. Changes in the applicable exchange rate may result in a decrease or increase in foreign exchange income or loss. The Company may enter into forward exchange contracts to manage part of the foreign exchange risk exposures denominated in U.S. currency, but has no forward contracts as at March 31, 2016.

The Canadian dollar equivalent of monetary assets and liabilities held by the Company that are denominated in U.S. dollars are as follows:

	March 31, 2016	December 31, 2015
Cash	\$ 274,305	\$ 133,434
Short-term investments	86,633	86,633
Deposits	119,466	384,802
Investment in joint ventures	17,533,907	19,334,118
Investment properties	12,043,540	-
Mortgage payable	7,886,368	-
Tenants' security deposits	50,071	-
Accounts payable	180,043	127,498

If the Canadian dollar had strengthened 5 percent against the U.S. dollar with all other variables held constant, the Company would have additional loss from foreign exchange included in net loss for the three months period ended March 31, 2016 of approximately \$425,800 (April 30, 2015 loss of \$39,300) and additional loss from currency translation adjustments of joint ventures and associates included in other comprehensive income or loss for the three months period ended March 31, 2016 of approximately \$1,484,200 (April 30, 2015 loss of \$773,500). If the Canadian dollar had weakened 5 percent against the U.S. dollar with all other variables held constant, the Company would have additional income from foreign exchange included in net loss for the three months period ended March 31, 2016 of approximately \$425,800 (April 30, 2015 income of \$39,300) and additional income from currency translation adjustments of joint ventures and associates included in other comprehensive income or loss for the three months period ended March 31, 2016 of approximately \$1,484,200 (April 30, 2015 income of \$773,500). The foreign currency exchange rate sensitivity in comprehensive income or loss is attributable to a change in the translation of monetary assets and liabilities, and interest in joint ventures and associates, denominated in U.S. dollars.

The sensitivity analyses do not take into consideration that the Company's assets and liabilities are actively managed. Additionally, the financial position of the Company may vary at the time that any actual market movement occurs or be mitigated by management actions to reduce exposure to risks.

Other limitations in the above sensitivity analyses include the use of hypothetical market movements to demonstrate potential risk that only represent the Company's view of possible near-term market changes that cannot be predicted with any certainty; and the assumption that all interest rates move in an identical fashion.

Fair values:

The fair value of cash, short-term investments, amounts receivable, deposits, accounts payable, promissory note payable and due to related parties approximates their recorded value. Fair value is an estimate of the amount at which items might be exchanged in an arm's length transaction between knowledgeable willing parties who are under no compulsion to act. The carrying value of the Company's convertible debentures and related party convertible unsecured subordinated debentures approximates fair value. The fair value of the Company's convertible debentures and related party convertible unsecured subordinated debentures has been estimated based on current market rates for convertible debentures with similar terms and conditions. Fair value should not be interpreted as an amount that could be realized in immediate settlement of the instruments. The estimate of fair value at year-end may not represent fair values at any other date. The determination of fair value is also affected by the use of judgment and by uncertainty.
